

# FRONT-END DEVELOPER

## WEB APPLICATIONS DEVELOPER

Studying and implementing software development tasks, with exposure to technologies such as HTML, CSS, JavaScript, SQL, Python and using/customizing Bootstrap libraries to design and develop web applications in order to transform ideas into an exceptional scalable, accessible, responsive, and user-friendly web application.

## Front-end Development | 2022

Collaborated with producers and artists to determine and achieve the desired sound by performing high-quality recording, mixing and production in an analogic-based professional studio.

## CEPI BASE SL

- Over than 60 hours learning technologies as: HTML, CSS, JavaScript, SQL, Python
- 40%/60% balance between theory and 'real word problem' exercises
- Deep use of Bootstrap5 as a main framework for web responsive/mobile first applications

## SAE INSTITUTE, MIDDLESEX UNIVERSITY

- Developed the technical skills and the knowledge required to collaborate with engineers, musicians and creative media professionals
- Learned the use of PureData, an open source visual programming environment
- Graduated with honours. "First class"

## ORT INSTITUTE OF TECHNOLOGY

- 2 semester class focused in MAX/MSP as a visual programming language for music & multimedia applications and interactive software
- Introduction to Csound software using the basics of C programming language

I confess that I've always looked sideways to coding and technology. The last crazy years helped me to stop and realise that there is always time to encourage change. Because change moves us. As a Front-end developer I see myself as a person who is creative and capable for structured thinking, being enthusiastic about developing attractive and innovative projects using the latest technologies. An inquisitive mind kind-of-person who is always excited to take up new challenges and being able to make a positive impact on the world through my work.

## 5 lessons learned

1. Nothing is someone else's problem. If you find it, take ownership where nobody else does.
2. You can always learn something new from others, be humble.
3. We can do ANY-thing, but we cannot do EVERY-thing. Prioritize and focus.
4. Efficient is a step further after being effective. The less, the more.
5. Be proactive.

## Skills

Technology	Popularity Score (Dots)
- HTML	10
- CSS	10
- JavaScript	9
- Bootstrap	8
- VueJS	7
- ReactJS	6
- SQL	5
- Python	5
